

Daria Utkina

Senior QA Engineer

📍 Spain | ✉ daria.utkina.qa@gmail.com | 🗣 Russian/English

Summary

I'm a **Senior QA Engineer with 5+ years of experience** testing products in different areas, such as marketplaces, TMS systems, mailings, and payments. I currently live in Barcelona and am looking for new opportunities, either in Spain or remote. I hold a valid EU work permit.

As a manual QA Engineer, I've worked on testing complex systems and handling a variety of scenarios. I focus on identifying risks early in the process, which helps reduce correction costs and improve product quality. I'm used to working with limited resources, prioritizing tasks, and ensuring stable, high-quality releases.

Work experience

Senior QA Engineer	ATI.SU	5+ years	08.2019 - 12.2025
- Launched and managed 3+ new services (marketplace, warehouse scheduling, email campaigns) from scratch, ensuring bug-free releases and testing complex business logic, even with limited resources and tight deadlines. - Modernized legacy systems, migrating from monolith to microservices, rewriting key modules, and delivering stable releases without downtime while improving product quality. - Improved automated test quality, increasing success rate from 60% to 99%, speeding up testing and enhancing system stability. Built the testing process from scratch for a product development team, which started with 2 people and has now grown to 9. - Improved and oversaw the testing process by planning, organizing, and managing testing activities, including conducting audits in several development teams, which resulted in a threefold reduction in incidents. Monitored quality metrics and focused on reducing defects to ensure high service quality. - Perform manual web testing, including API and front-end testing. - Conduct functional, smoke, regression, integration, UI/UX, end-to-end (E2E), localization, security, load, and database testing (MongoDB, PostgreSQL, MSSQL). - Analyze logs using Kibana, Elastic, and Sentry. Track and manage defects in Jira/Kaiten. - Develop and maintain QA documentation based on test design principles. Maintain an up-to-date knowledge base. - Review requirements, specifications, and design, providing constructive feedback. - Act as a triager in the Bug Bounty program (analyzing reports, confirming vulnerabilities, and communicating with security researchers). - Utilize strong analytical thinking and problem-solving skills, complemented by excellent communication abilities.			

Skills

Applications: Marketplaces, Mailings, TMS systems, Billing, News portal

Methodologies: Agile, Scrum, Kanban, Lean

Technical Skills: MongoDB, PostgreSQL, MSSQL, Elastic Search, Redis, Swarmpit, RMQ, Grafana, Kibana, Django, Gitlab, Sentry

Testing Skills: Quality Assurance, Functional Testing, Quality Management, Manual Testing, Web Testing, Integration Testing, API Testing, Load Testing, Static Testing, Software Documentation, Mentoring

Tools: Postman, Charles Proxy, JMeter, BrowserStack
